REVIVE : RELAX : RENEW

Promoting a healthier mind, body and planet

RE:MIND offers a luxury hand and body care range; raising the bar through a first of its kind collaboration with Amplify Goods, a certified diverse social enterprise.

The range launches with a cleansing and uplifting Hand & Body Wash, available in 5L refills and a nourishing Hand & Body Lotion with soothing shea butter in 1L refill pouches.

Both are paired with 500ml glass bottles that are washable and built to last and not to be disposed of. The 'Forever' bottles produced and hand-packed in the UK, using upcycled cardboard waste from local businesses.

The carefully selected ingredients are between 96% and 99% naturally-derived, depending on the product – and are Vegan Society certified. RE:MIND offers premium quality products with mood-enhancing essential oils, other responsible ingredients and a 'Forever' glass bottle and bracket are designed to enhance the washrooms of offices, spas, hotels, restaurants and bars.

RE:MIND has been designed with environmental and social impact front-of mind, which we know is increasingly important to businesses.

The purchase of RE:MIND not only supports charitable initiatives at the intersection of mental health and nature, but products also champion waste reduction, to help us all reduce and reuse before relying on recycling.

Amplify Goods, a diverse social enterprise will donate at least 50% of their profit from RE:MIND to supporting grass-roots charitable projects.
